

Revinetix Sentio Disk2Disk2Disk Backup Appliances

The Revinetix innovative Disk2Disk2Disk™ data protection solutions provide backup, archival, and retrieval of critical customer data for SMB/SME organizations. The full-featured and simple-to-use turnkey integrated appliances deliver affordable, total disk-based backup products that eliminate the traditional weak link of data protection: slow, failure-prone tapes. The appliances are easily implemented and managed with a point-and-click browser based interface. The systems can also be used to augment existing SANs.

SENTIO

Removable Archive Drive

Key Features

- **All-in-One Solution**
 - Fully Integrated Turnkey Appliance
